Nadine Donazzan from DNA Design, recently Designed and Project managed, our recent Lobby refurbishment at 211 Bulwara Rd, Pyrmont. The building was built in 2010 and is a building consisting of 41 Lots.

The brief to Nadine was to create a durable and attractive design. From the moment works began, Nadine was 100% on board in every way, with communication and attention to the project and trades. Extremely personalized and committed to achieving the desired results for the clients, which definitely shows in the results of her work.

Our project was completed in the timeframe and Nadine was on site every day when the trades were there ensuring attention to detail and making sure the site was always cleaned at the end of the day. As a Strata manager, I was relieved and grateful to Nadine for making the whole process so achievable and easy. Throughout the process she involved the committee and myself in decisions that were necessary and managed the rest.

The Interior Lobby refurbishment has definitely added financial value to the property, and I can honestly say Nadine has a passion and love for making a space feel welcoming and visually appealing. We are thrilled with the results and could not have made a better decision to engage DNA Design.

I would have no hesitation in highly recommending Nadine and DNA Design for any works in the future.

Regards,
